

R.J. Pagan & Associates, Inc. is a civil engineering firm that offers a wide array of comprehensive horizontal design and construction related services. Our approach to each project is to bring practical solutions to our clients through a vast knowledge base of construction experience coupled with highly skilled professional engineers tailored to meet the specific needs of our projects. Our core areas of expertise include construction management of major interchanges, construction engineering, bridge design, bridge inspections, and at risk construction management. We are dedicated to building long term relationships by striving to exceed client expectations one project at a time.
